MAINTENANCE PLAN FOR PIGEON LAKE ROAD

A delegation representing the Edmonton Automobile and Good Roads association, waited on the Hon. Alex. Ross, minister of public works, Monday in connection with various matters pertaining to roads, in which was included the request that the government maintain the Pigeon Lake road west of Wetaskiwin.

At first the resolution presented by the association from the Wetaskiwin section was turned down, but at the close of the other business, the question was again brought up, and J. W. Herie, of Wetaskiwin, presented the case for Wetaskiwin and the district west of the city, explaining the need of this highway being kept in repair. After some discussion on the matter, Mr. Ross finally agreed to work out some plan of maintenance.

The condition of this road at present is the worst it has been in for some years, and it is not kept in repair now it will soon deteriorate so that it will become almost impossible for traffic to the lake and west. The road carries the heaviest traffic of any road in the district and is the only means the settlers west of the city have of coming to Wetaskiwin.

The matter should be followed up by the proper authorities to see that repairing and dragging is done immediately before the road becomes in such a state that it will have to be regraded.

GRADE VIII. AVERAGES AND PROMOTIONS

Pupils promoted in Grade VIII. (Miss Carlson) without examinations, with averages for the year.	
Helen Higgs	88.18
Gwen Williamson	88.5
James Munn	84.7
Marcella Elrich	84.7
Evelyn Johnson	82.2
Georgia Campbell	82.2
Myra Alexander	81.9
Agnes Macfarlane	81.9
Dora Wallace	80.
Grade VIII. averages for term beginning in January and ending June:	
Helen Higgs	88.26
James Munn	85.0
Gwen Williamson	83.20
Evelyn Johnson	73.20
Marcella Elrich	80.40
Myra Alexander	79.00

Lillian Scott	60.25
Bernadette Nielson	57.80
Lillian Hannu	57.80
James Orr	53.90
Elmer Donnelly	53.90

Lethbridge Mail Plane is Wrecked in North Dakota

Lethbridge, June 27—Lethbridge fliers' hopes crashed on Monday afternoon at Minot, North Dakota, when the mail plane, piloted by Pittsman and Palmer, was wrecked by hitting an automobile containing women and children during a test flight.

Two women with children were driving near the aviation field. The mail plane, bound for Ottawa, had just been overhauled, and Palmer was making a test flight. One of the women was teaching the other how to drive and she stopped the car directly in the path of the incoming plane. Palmer wrecked the machine rather than cause a tragedy. No one was hurt.

The plane is being stripped and sent back to Lethbridge, as it was found impossible to repair it there. This was the finale of the hard luck which had followed the plane. For and to land at Robert owing to a leaky foot pipe, the plane was delayed for two days by the big storm in Manitoba and Saskatchewan, only to be wrecked through no fault of the fliers at Minot.

New York, June 26—Jack Britton, world's welterweight boxing champion, successfully defended his title against Henry Leonard, lightweight champion, Referee Patsy Haley claiming that Leonard hit Britton while the latter was on one knee, in the thirteenth round of their fifteen round match tonight.

MILLET MISSION BAND SOCIAL

The Mission Band will hold a picnic social on Tuesday afternoon, July 4th. Extra features will include a variety of entertainment will be given by the members and president, Mrs. A. Dowder. Everybody is welcome.

WETASKIWIN TRIMS CROOKED LAKE, 3-0

The Wetaskiwin city baseball team defeated Crooked Lake by a shut out score of three to nil on the Wetaskiwin diamond on Monday evening last. L. Harvey pitched well for Wetaskiwin and received good support. Leo Norstad a good game for the visitors.

The next game will be played with Ponoka on the local diamond this evening (Thursday), and a good game is expected.

WORLD'S FASTEST CAR CALGARY EXHIBITION

Calgary, June 28—The world's fastest automobile, Sig. Haughaug's three mile a minute Wisconsin Special, will be shown at the attractions at the Calgary exhibition, June 30 to July 7, as the result of arrangements made by the management with the newly arrived car.

The giant 27 horse power machine is to be on display throughout the exhibition and on Thursday and Friday, auto runs, it is to be driven in the time trials during the speed contests, when new world's records for circular tracks will be sought by the half score of nationally known drivers who will be in Calgary for the racing events.

The big machine which Haughaug is bringing to Calgary travelled one mile in 18.97 seconds, three miles a minute at a rate of 184.7 miles an hour, the greatest speed ever made by a human being on land or water. A big hydroplane motor, built entirely of aluminum furnishes the power for the unique machine. The body of the car is but twenty inches wide and is stream lined in every detail to reduce wind resistance. It is expected to be the biggest attraction of the exhibition.

Crow's Nest Pass Report Was Adopted by House

Ottawa, June 28—After five hours' debate the house tonight adopted the report of the special committee on railway transportation costs and recommended further suspension of the Crow's Nest Pass agreement, with the exception of the rates on grain and flour.

Conservatives who broke from the committee in protest Saturday night again contested the report on the floor of the house. They had an amendment, moved by Sir Henry Drayton, that the railway commission be empowered to suspend the Crow's Nest Pass agreement, and the bill was followed immediately by amendment to the government in council of a new schedule of rates as reduced by the commission, but the Conservative opposition did not prevent the bill from passing. The bill was passed by a vote of 165 to 125.

PRICES PAID FOR KNIGHTHOOD ARE ASKED IN HOUSE

Ottawa, June 24—Fifteen members of the house of commons have agreed to support the submission of a motion for the appointment of a select committee to consider the system under which honors are conferred, the idea being to discover what changes, if any, are necessary to ensure that honors should be given only as a reward of public service.

Questioned in the house on this matter, Mr. Hon. Amos Chamberlain, government leader, said the present practice was for recommendation to be sent direct to the premier by the different government departments, to Joseph Devlin, M.P. for Belfast, Ireland, said, "Will Mr. Chamberlain state what is charged for a baronetcy, and what price has to be paid for a knighthood?"

There was no answer to this question.

Port William, June 28—Following the election of Mrs. C. Carmichael of New Glasgow, N.S., provincial vice president for Nova Scotia at the provincial convention of the National Council of women passed a resolution late this afternoon urging that certificates of honor be issued previous to the start of the social hygiene movement. Introduced by the council will, it is hoped, do much towards ameliorating conditions and in time make health certificates possible.

Winnipeg, June 24—The death list resulting from the destructive wild storm which struck Manitoba early on Friday morning, still stood at 23 this morning. No further reports of fatalities were received from the outlying areas during the night. It is estimated that less than a million that only one death resulted from the devastation wrought at Portage la Prairie, where conservative estimates place the amount of damage in the city and surrounding district at approximately \$2,000,000.

HOLIDAY SATURDAY

Saturday next, July 1st, being Dominion Day and a public holiday, all business places in the city will be closed.

The stores will keep open late on Friday evening to accommodate week-end shoppers.

OBITUARY

MRS. P. J. KUESTER

The death took place on Tuesday of this week of Mrs. P. J. Kuester, wife of P. J. Kuester, at the age of fifty-two years and five days, after a short illness of seven days. Decidedly a born in Wisconsin, U.S.A. in 1870, and came to Alberta with her husband nineteen years ago, and has resided east of the city since that time. A sorrowing husband and six children were left behind.

PATHFINDER CAR ARRIVES AT JASPER

Jasper, June 23—The pathfinder car on the proposed Jasper Highway, Edmonton to Victoria, arrived in Jasper, June 23rd from Edmonton. The party is travelling via Jasper and Kamloops over the original G.T.P. grade and the old tote road. They leave for Kamloops on June 24th. The pilot is W. H. Neillinger and is accompanied by P. A. Robb and N. J. Silverthorne.

SIR HENRY WILSON WAS ASSASSINATED ON THURSDAY LAST

London, June 25—Field Marshal Sir Henry H. Wilson, one of England's most illustrious soldiers, who was chief of the imperial staff during the last stages of the world war, was assassinated on the doorstep of his residence in Eaton Place on Thursday afternoon by two young men who gave the names of James O'Brien and James Connolly.

FEDERAL GOVERNMENT CLOSED FIRST SESSION WEDNESDAY MORNING

Ottawa, June 28—Louis David, deputy leader of the opposition, today (Wednesday) formally prorogued the first session of Canada's fourteenth parliament. The end of the session was marked by a number of incidents. The session was closed by a vote of 165 to 125.

Managers were appointed of each house and there were protracted conferences. In the end the house accepted the senate amendments to both bills. The commons managers proposed to make the exercise of import the bill regarding the cancellation of leases, as it passed, and the commons managers proposed to make the exercise of import the bill regarding the cancellation of leases, as it passed, and the commons managers proposed to make the exercise of import the bill regarding the cancellation of leases, as it passed.

THE LATEST THING IN FREAK EGGS

We have had numerous reports of large eggs from farmers and residents of the city and district this year, but what we surmise to be the largest and most freakish was brought to us by a woman who lives near the city. It was a large egg, about the size of a hen's egg, but with a very peculiar shape.

SIR H. M. ALLAN EXONERATED BY JUDGE CUSSON

The charge against Sir H. Montagu Allan, former president of the defunct Merchants Bank, of having "signed and concurred" in the 1921 October return of the bank's financial statement, which was submitted to the federal government, was on Thursday dismissed by Judge Cusson, after several witnesses had testified, including H. B. Macdonald, Hon. C. G. Haultain, Farquhar Robertson and Howard Wilson.

RECORD SEIZURE OF CONTRABAND LIQUOR IS MADE

Montreal, June 24—What is claimed to be the largest seizure of contraband liquor in the history of the province was made Wednesday when over 4000 gallons of 65 per cent overproof alcohol, consigned to Toronto and the west, was taken over by customs authorities by the Outremont railway station. The liquor had been shipped from Cuba and had arrived here disguised as "cognac".

BRITISH GOVERNMENT'S IRISH POLICY IS GIVEN VOTE OF CONFIDENCE

London, June 26—After a debate which was not so heated as had been expected, the government tonight won a virtual vote of confidence on its Irish policy, when a "die-hard" motion proposed by Sir Frederick Banbury, proposed for a reduction of the chief secretary for Ireland's salary as an expression of disapproval of the government's policy, was defeated, 342 to 75.

REUNION OF GRADUATES AT Olds Agric. School

Olds, June 28—What promises to be a big day for the ex-students of the school of agriculture at that place, journeying from all corners of Alberta as well as many from neighboring provinces, will meet for their second annual midsummer reunion. A very large attendance is predicted.

MASONIC PICNIC, JULY 12, AT LUCAS GROVE

The Masonic picnic will be held at Lucas Grove this year on Wednesday, July 12. All Masons and their families are extended a cordial invitation to attend. Several committees have been appointed, and all kinds of sports and games will be held.

HAILSTORM CUTS DOWN CROPS IN CENTRAL ALBERTA

Calgary, June 27—Sweeping down with three miles wide and forty miles long, hail completely destroyed the crops between Blind Creek and Minto in central Alberta on Monday evening. In no part of the area affected did the hail pass out of the three mile bounds, and it stopped at Minto as suddenly as it had begun. The storm was over in less than an hour.

RECORD SEIZURE OF CONTRABAND LIQUOR IS MADE

Montreal, June 24—What is claimed to be the largest seizure of contraband liquor in the history of the province was made Wednesday when over 4000 gallons of 65 per cent overproof alcohol, consigned to Toronto and the west, was taken over by customs authorities by the Outremont railway station. The liquor had been shipped from Cuba and had arrived here disguised as "cognac".

High proof alcohol is said to be in great demand in the dry provinces, where it is diluted and sold at \$1 and \$1.50 a quart. This would bring the value of the consignment to some extent in the neighborhood of half a million dollars.

PARISH PICNIC

The parish picnic held under the auspices of the Catholic Women's League assisted by a committee of men of the congregation was held at Lucas Grove on the 26th instant, and proved most successful.

WINTER'S SUPPLY OF FEED

There is nothing moving very much in the hay trade just now, and prices are about the same as last week. There is a very unusual demand for feed by dealers, and they are buying the limited quantities they require at country points for around \$15 and \$20 for shipping.

ANNOUNCEMENT

Mrs. L. Thoma announces the engagement of her daughter Lenore (Lenore) to Mr. R. Ross Annet, of Calgary, Alberta, the marriage to take place in July.

The Weed Campaign

Municipal districts throughout the
province are intimating their readiness
to cooperate with the weed branch of
the department of agriculture in a
general campaign for weed eradica-
tion. Letters are being received by
the weed branch which indicate that
the municipalities are coming into line
in splendid shape in the organization
to clean the province of weeds.

During the past week the appoint-
ment of Harold Wooster of Nanaimo
as divisional superintendent of weed
inspectors for southern Alberta, Mr.
Wooster has been acting as inspector
for the Lethbridge district. A divisional
superintendent for the northern
districts will be appointed shortly.

The department of agriculture is
endeavouring to perfect community or-
ganization in the weed campaign, by
enlisting the cooperation of farmers,
and organizations of all kinds, as well
as the railway companies and municipalities.

The convention of government weed
inspectors held at Chesham last
week of the south were present as well
as a number of municipal inspectors.

Hon. Geo. Hoadley, minister of agri-
culture, took occasion during the con-
vention to address a public meeting on
the subject of weed eradication.

By the way, the weed inspectors
spoke on the weed act and the prob-
lems arising out of the act. J. C.
Hooper, principal of the Chesham
agricultural school, spoke on the iden-
tification of weeds and weed seeds,
and had some very fine specimens in
both mounted and freshly collected.

P. S. Grisdale, of Olds school, spoke
on systems of eradicating weeds, and
Mr. Walker, manager of the Char-
holm farm, spoke on cultivation. Dr.
Tahol, provincial veterinarian, spoke
on the identification of poisonous
weeds, how they act on livestock and
the antidote. S. G. Carlyle, livestock
commissioner, spoke on the relation
of livestock to better farming. Har-
old Wooster gave a paper on the or-
ganization in the districts, and Hon.
ward Wright of Airfield, gave a paper
on the duties and responsibilities of
weed inspectors. There was a very
lively discussion on all subjects and
a similar convention was held at Olds
last week, at which similar addresses
were given and at which H. A. Craig,
deputy minister of agriculture, spoke
in place of Hon. Geo. Hoadley.

New Labor Commissioner

Announcement has been made by
Hon. Alex. Ross, minister of public
works and labor, of the appointment
of Walter Smitten, of Calgary, to
be commissioner of labor for Alberta,
under the act passed at the last session
creating a labor bureau. Mr. Smitten
will assume his duties at once. His
first duties will be to organize the
bureau of labor. It is the object of
the government to coordinate all labor
legislation which will come under
the jurisdiction of the new depart-
ment. Mr. Smitten has been secretary
of the Alberta federation of labor for
a number of years, and is known as
one of the best authorities in the
province and in the dominion on labor
matters. He has been a member of
several bodies of consultation and was
a member of the minimum wage board
of the province.

Hon. Geo. Hoadley, minister of agri-
culture, will visit points in Minnesota and Wisconsin
shortly to select two Holstein bulls
which will be placed on government
farms. Mr. Hoadley also expects to
go to Ottawa to take up several mat-
ters of importance, including the
question of the grading of hops which
was to have started this year.

Trip for Members

A trip for some of the northern
members of the legislature and northern
residents through the southern
Alberta irrigation districts and other
parts of the south, is being planned
by Hon. Geo. Hoadley, to take place
towards the end of July.

E. S. Bishop, recently appointed a
commissioner under the liquor act, has
left for the east where he will conduct
an investigation into the working of
the several prohibition acts in force
and the administration of prohibition
departments of the various govern-
ments.

Farmers of the New West district
near Vauxhall have decided to organ-
ize an irrigation district.

A good deal of summerfallow is
being undertaken this year, according
to reports from southern Alberta. M. L.
Frong, agricultural agent at Leth-
bridge reports considerable summer-
fallow being done in an excellent
manner. The practice of cropping the land
in strips to prevent soil drifting has
also been carried out this year north
of Lethbridge to a considerable ex-
tent. Stripping of summerfallow with
corn and oats is also being carried
out.

E. J. Frean, who has been appointed
by Attorney General Brownlee to
act as commissioner under the south-
ern Alberta drought relief act, has
issued a statement from his head-
quarters in Calgary asking that all farm-
ers in the drought relief area who
wish information concerning their
own problems of finance to write to
him.

Plowing Matches

Very successful plowing matches

Freight Rate Reductions

As announced from Ottawa, the
special committee of the house of
commons on freight rates has decided
upon the suspension of the Crow's
Nest agreement for one year, and has
agreed upon the offer of the railways
for a reduction of rates on grain of
about 20 per cent and on other basic
commodities of 16.66 per cent. Treas-
urer Greenfield and A. Chard, freight
superintendent of the provincial govern-
ment, who have returned from Ottawa
after giving evidence before the special
committee, believe that the decision
will result in a considerable bene-
fit to the farmers of the west, and
express hope for a further reduction
later on.

A. Chard, freight superintendent, has
been taking up the matter of rates on
shipments of fish from northern Al-
berta ports, and hopes to be able to
secure a reduction of rates on ship-
ments on Alberta shipments, which it
is claimed operates to the disadvan-
tage of shipments from Alberta.

New pamphlets on practical irriga-
tion, and summerfallow have been is-
sued by the department of agriculture.

The Grasshoppers

Campaigns against the grasshop-
per are proving very effective in
southern Alberta. The need of con-
tinued effort is emphasized, however,
and also the necessity of committing
in built where possible. It has come
to the attention of the agricultural de-
partment that many are placing bait
during the afternoon. This has been
found to be a waste of bait. The
proper time to place bait is generally
between 6.30 and 9 in the morning.
It has been found that the proportion
of 23 sawdust and 13 bait is having
good results. It has also been found
possible to cut down the amount of
sawdust to an amount not exceeding
two quarts to every 100 lbs of dry ma-
terial, increasing the proportion of
bait to 5 pounds. If these proportions
are used in mixing bait, economy can
be effected, and just as good results
obtained.

Women's Institutes

The convention of women's insti-
tutes held at Calgary was the most
successful in the history of the organi-
zation. Over 700 delegates were
present in attendance. One of the chief
speakers was Hon. Geo. Hoadley, the
minister of agriculture, who explained
the new status of the women's insti-
tutes in the new amendments passed
at the last session, and who declared
the intention of his department to
continue to aid the institutes in ex-
tending their efforts. The government
of the new amendments, had narrowly
made provision for all women's soci-
eties to have an opportunity of having
extension work. This department,
while it would no longer pay the ex-
penses of all delegates of the insti-
tutes to the annual convention, had
this year paid the expenses of the
advisory board and provincial conven-
tions of committees. Mr. Hoadley said
the advisory board would be consult-
ed whenever changes in legislation
affecting the institutes was in con-
templation. Miss MacMillan, director
of extension work, described her ex-
tensive work in furthering the work of
the institutes and in assisting them as
well as other women's societies in
doing valuable community work. She
said that her desire was to see the
office of the extension service used
as an information bureau for all rural
women's societies, especially those in
rural districts. A very interesting pro-
gram of addresses was delivered dur-
ing the convention.

ALL WIRES DOWN

EAST OF KENORA

Ottawa, June 24—A severe wind-
storm sweeping east from the Kenora
district yesterday, put all telegraph
wires out of commission west of Port
Williams and blew a box car from the
track at Lyndall, 40 miles east of Win-
nipeg. Many reports received here
indicated that lightning and heavy
hail caused great damage.

ALBERTA BUTTER
IS NOW ROLLING
EAST AND WEST

Butter conditions are looking just
as good, perhaps a little better, than
last week, and both east and west
there are inquiries for Alberta butter
and shipments rolling in both direc-
tions. The cream receipts have been
on the whole a little larger, according
to reports made by the Calgary man-
ufacturers.

Prices are all unchanged, on both
cream and butter. No. 1 cartons are
selling locally at 25c. In calots, on
basis of specials, there is a quotation
of around 32c and 33c. Montreal
prices on butter are holding up well,
and there are indications that Al-
berta business will move in that direc-
tion. The price quoted there on Wed-
nesday was 36 and 36 1/2c which is
about in line with the Vancouver
prices. Of course, the creamery that
can make sales to the coast has the
advantage of the spread in freight.

Some fear had been expressed last
week that the stir in the eastern but-
ter market was only temporary, but
apparently it was more than a flurry,
and it sales can be put through on
the present basis of prices for some
little length of time it will be a great
stimulus to the Alberta market.

Manufacturers are anxious if possi-
ble, to raise the cream prices. In a
season like this when food is not any
too plentiful and cream prices low
there is a danger that some will be
turned out and production suffer. Dur-
ing the hot weather it is hard to main-
tain the grade of cream, where ship-
ments have to be made any distance,
which is also discouraging to the pro-
ducers. They must remember, though,
that the quality of the butter depends
on the conditions in which cream is
received at the point of manufacture, and
that determines the butter price, and
what the creameries can pay for their
cream.

Those who have cows milking and
any reasonable supply of feed should
not be in any hurry to turn them
off, for if the butter market
keeps in the direction in which it
has been heading for the past week or

more, it seems that the creameries
will be able to raise the prices in
cream.
Cheese factories are getting pretty
busy now, and there will be quite a
lot at 17 and 20c. Market Examiner.

CALGARY EXHIBITION

June 30 to July 7

Canada's New Governor General

Food Value of Dairy Products

Milk and dairy products generally are of inestimable food value to the human race, and their comparatively moderate cost make them accessible to practically every one. Further than that, the products of the dairy add immensely to the health of the country. It is a question if the people of Canada sufficiently appreciate either the economic value of the dairy industry to the country at large, or the food value of milk and its products to the individual. In the consumption of these products greatly exceeds ours. In butter we do better, but in milk our consumption individually has been shown to be one quarter of a pint compared with half a pint per head in the United States. Since the advent of prohibition, however the United States consumption per capita has increased to three quarters of a pint, and there is evidence to show that Canadians are also taking a great deal more to the lactical fluid than formerly.

The importance of milk in the diet of both young and old is constantly being emphasized by the medical profession. Malnutrition or undernourishment, it should be understood, is not always the result of insufficient food, but frequently of unwise and improperly chosen food. This is supported by the fact that investigation has shown that a large percentage of undernourished children are the offspring of well-to-do parents. The thoughtful mother will see that her children get plenty of milk from which to build a strong framework, develop mental capacity, and good health. Future happiness depends largely on these factors.

Own Your Own Home

A campaign that is worthy of support, and one that is to be hoped will prove largely successful and be persisted in from year to year, is now in progress in quite a number of cities and is finding prominence in the news and advertising columns of the daily press. It is a campaign of publicity for educated people as to the wisdom of taking steps to acquire a home of their own instead of remaining "renters" all their life. While such a campaign can probably be carried on more spectacularly in effect in the larger centers of population, it is one that might well be extended to towns, villages and hamlets, and what is of even greater importance to the strictly rural community.

Nothing is quite so well calculated to give stability to a nation as to have its citizens, to as great an extent as possible, the actual owners of the dwellings in which they reside. Whether it be man or woman who is the owner of his country, province, and local community in the form of a piece of land owned by them and upon which they have established their home, certainly very desirable results follow. In the first place, such persons are far less likely to be influenced by demagogic appeals of agitators designed to undermine the stability of the state; and to shake public confidence in national institutions. The person with a fixed stake and interest in the country will give thought to the country's unmarking on a risk enterprise, whereas people having no such interest in the country are more easily led astray by the professional trouble maker. Ownership of a home constitutes a powerful factor leading to permanence of population. It is the man having no real interest in a community, as evidenced by lack of his own home, who is here today and gone tomorrow. It is the renters of the world who are forever on the move and who because of a lack of a stake in a given community will likely keep on moving and never amass anything. The family living in a rented house inevitably take less care of the property than would be the case if it was their own. They do not exert themselves to anything like the extent an owner would to improve and beautify the property, with the result that communities where renters predominate do not present the same prosperous, go-ahead appearance which marks a community of home owners. The incentive to steadily add to the value of the property is lacking; on the contrary, the opposite effect is too frequently noted because improvement of the property by the renter may cause a result in a demand from the landlord for a higher rental.

What is true in the case of a resident of a city or town is equally true of the renter farmer as compared with the farmer owner. It is the renter who strives to get all he can out of the soil during the usually brief period of his sojourn on the land. He is not concerned about the soil, with the result that the land and buildings deteriorate and the community, province and country suffer loss.

It is gratifying to learn, therefore, from statistics recently compiled that

ROYAL YEAST CAKES

MAKE PERFECT BREAD

For many years physicians have prescribed yeast for the correction of certain physical disarrangements, such as boils, constipation, pimples and intestinal troubles. Royal Yeast Cakes are rich in vitamins and serve to tone up the blood. Royal Yeast Cakes are on sale in practically every grocery store. Send name and address for free copy "Royal Yeast Cakes for Better Health."

E. W. GILLET COMPANY LIMITED
TORONTO, CANADA
MADE IN CANADA

no other country in the world shows such a high proportion of home owners in the larger cities as does the Dominion of Canada, and in this respect the cities of western Canada are ahead of those in the eastern provinces. It is a probable fact, too, that though figures are not available, that in respect to ownership of land by farmers who are tilling the soil Canada occupies a higher place than other countries. The majority of farmers in Canada are owners, not renters, but there appears to be a tendency in this country—and to an even more alarming degree in the United States—for renters to increase in numbers. Great Britain has realized the mistake of having huge tracts of land owned by the few and the great majority of agriculturists renting to the few. Now the great British estates are being broken up, and many farmers are thus being enabled to secure land of their own.

Here in Canada the stability of the state, the securing of permanence of population, the improvement and permanent development of property, and the maintenance of a high standard of living all call for the giving of every possible encouragement to the people to become the owners of homes of their own. Buying or building a home is good business for the individual as well as for the state. "Own Your Home" should be the ambition of every Canadian.

HOW BIG A HOUSE FOR HOW BIG AN INCOME

The experienced architect, specializing in home or residence construction, will today approach his client's home building aspirations with a cold calculation of construction costs covering a temporary low buying power of the dollar as applied to building materials. His estimate of the type of building he can construct for a given sum will be upon the present market price levels of building materials and equipment, but upon the probable market fluctuation of material prices from six to twelve months ahead, and he safely figures the estimated cost at practically the 1919 levels, not the pre war levels, as many timid home builders who he would.

His position in the building world places him in intimate contact with manufacturing and distributing conditions of the moment as well as months beyond. He knows that the opportunity for the prospective builder to purchase at present favorable levels will melt away as the vast potential demand for building material, railroad, commercial and industrial construction and replacement. He takes the estimate upon which the prospective home builder has worked out his family building fund and adds to it. For instance, the average householder allows 42 per cent of income for food, 16.6 for clothing, 13.6 for miscellaneous necessities and luxuries, including recreation and medical necessities, 14.3 for housing, 4.3 for furniture and furnishings, 4.3 for light and fuel, and 5 for investment. As a factor of safety the architect will set down a round fifth of the family income for housing, furniture and furnishings. Upon this basis he will advise the prospective builder of a residence that he can

have his choice of two types of house his building fund will allow, one costing 30 cents a cubic foot or one costing 50 cents, and will show him a sketch of a house worked out to a definite schedule in number of rooms and size of the house in exact proportion to the size of his building fund. With perhaps some slight variation depending upon the section of the country in which the house is to be erected.

He will show him, for instance, that for 30 cents a cubic foot, a 1500 sq. ft. house will be divided so as to allow him on the fifth of a nine-cent basis set aside for housing an annual appropriation of \$400 for rent each year, giving him a safe margin for investing \$400 in a lot and house, of which \$300 will go for the purchase of a lot, leaving \$100 for the construction of a small bungalow without basement, providing three or four rooms. At 50 cents per cubic foot the investment will give him a simple hunting lodge of stone and native wood construction.

On an income of \$2500 the investment in a house and lot may safely be \$5000, which will be divided into \$1000 for a lot, \$4000 for the building of four rooms, the total house running to an area of 13425 feet, on the 30c per cubic foot basis. At 50c a cubic ft., the best the builder can expect is a simple frame house of cottage type without cellar, in the country.

A yearly income of \$3000 represents a rent investment annually of \$600 and on this basis \$6000 may be safely invested in a house of from four to five rooms, size about 20x27 feet, of which investment \$1200 may represent the lot and \$4800 the actual construction of the building into 30 cents a cubic foot; 50c will give a little better house but a room less.

With an income of \$3500 the rent allowance would be \$700 a year, which will permit him to make a ten-year investment of \$7000, getting \$1400 into a lot and \$5600 into a house which will be a residence of five or six rooms, 26x29 feet, at 30c a cubic foot, while at 50c he will be able to build nearer to a large city or commuting centre, a three or four roomed bungalow without basement.

An \$8900 income normally indicates that the rental charges for the year are \$1600. Therefore, \$1600 could safely represent a home building investment in a well located section of a suburban community, giving the occupant nine or ten rooms, and representing an area of 34x40 feet standing on a lot costing \$2300; this would leave a house construction cost of \$1200 at 30c a cubic foot, or for 50c he could have a seven room brick or hollow tile house, 25x32 feet.

If the prospective home builder's fancy has reached a point where he can think in terms of a home of eleven or twelve rooms and a size of 80x65 feet, he should have an annual income of \$12,000 and should be able to pay as much as \$2400 a year rent.

THE FOOL THAT DROPS THE MATCH

It has been said that anywhere. The biggest fool effort. Is he who makes a rocking chair. Or someone else's boat; But equal with him in the race, The eggs of woe to hatch. In, in unknown or known disaster. The fool that drops the match. What let's to him it, in his haste, A fragrant weed to try. The folds of a woman's pride and taste Hangs dangerously high? What is a precious life recede, With flame enhanced disaster? He did not do the shameful deed; He only dropped the match. What let's to him if story of wealth In flame may disappear. Or friends that walked in joy and health.

May nevermore come near? What if explosions upward spring, A hundred lives to snatch, He did not do much of anything. He only dropped a match. Inevitably—guilty one. (As yet not doing time) You'll learn your lesson ere you're done.

That carelessness is crime, But when your future home you view And lift its red hot heat No matter then how often you May drop your lighted match?

Kamloops, B.C., June 25—Reports received here tell of the worst grasshopper plague ever experienced in British Columbia. They are gaining in strength, and unless drastic control measures are taken, the next two seasons will see a war between the grasshoppers and the farmers for the crops.

BRONCHIAL ASTHMA

Choking and Gasping for Breath Relieved by "FRUIT-A-TIVES"

MRS. PENNINGTON

"In 1919, I was taken with bronchial asthma and no one knows what I suffered with it during the winter. I began having Choking Spells—gasping for breath and could not speak. 'Fruit-a-tives' and in a few days, the choking spells stopped, and I have had none since May 7th, 1920. I have so wanted to tell other sufferers who have this terrible affliction about 'Fruit-a-tives' for I know how they must suffer."

Some thought the Asthma would come back on me as winter came on but it has not, thanks to 'Fruit-a-tives'. Mrs. J. M. PENNINGTON, 606 a box, 6 for \$2.50, trial size, 25c. At dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

REPORT OF THE COMMITTEE ON RE-ESTABLISHMENT

The report of Mr. Herbert Marler's committee on re-establishment problems was submitted to the house of commons last week. The section dealing with the condition of soldier settlers on the land recommends exemption from interest payments for periods varying from two to four years for settlers who went on the land prior to October last and extends the time for the payment of stock and equipment loans to 25 years.

The sub-committee, of which Mr. Alfred Speckman is chairman, directed the inquiry more particularly to the problems of the men actually established on the land who are endeavoring to cope with the difficult problem of interest to the period of readjustment and the general adverse economic situation common to agriculture generally. Under the act 21,391 men had been granted loans and actually settled up to March 31, the amount of loans granted being \$38,535,997. In the four years preceding January 31, 1922, 2352 soldiers, or less than 11 per cent, had abandoned their efforts. This number included 853 where abandonment was due to the death or recurrence of war disability of the settler, so that the real failures amounted to not more than 1470, or 6.1 per cent of those settled by loans.

This number included 853 where abandonment was due to the death or recurrence of war disability of the settler, so that the real failures amounted to not more than 1470, or 6.1 per cent of those settled by loans. The had been returned to the finance department \$11,585,781, the amount outstanding being about \$76,000,000. "It would appear," says the report, "that owing to the general economic depression, which has been particularly severe in the agricultural industry, there has been a general deflation in the value of farm land, farm stock and farm equipment over the whole of Canada. It would also appear that the situation in agriculture, which was so difficult for experienced farmers to cope with, presented even greater difficulties to the soldier settler, who, though established on land recently, was required to meet heavy payments each year."

The committee could not describe in exact terms the extent of this deflation; it was only possible to estimate

50c box—All dealers.

McCormick's Jersey Cream Sodas

It was generally shown, the report continues, that the Soldier Settlement board was exceedingly efficient in supplying stock and equipment, and in fact the land also at exceedingly moderate figures. Lands which had come back into the hands of the board had been sold at a greater price than was paid by the board; therefore, but on this the soldier himself had paid ten per cent of the value. The average price paid by the board for live stock and equipment, although somewhat at the time of purchase, would be higher than paid for the same live stock and equipment now.

The following suggestions for relief were made to the committee: (1) revaluation of the land, stock and equipment; exemption of interest for a period of years; a reduction in the rate of interest, and an extension of time for the redemption of stock and equipment loans.

The situation, says the report, should be approached from two viewpoints. The first, that the State has involved a large amount of public funds which can only be repaid by keeping the settler on the land and by encouraging him in every reasonable manner; and, second, that it is perhaps in the interest of the state to have now land opened up and improved or partly improved land developed agriculturally. Soldier settlers had brought under cultivation 600,000 acres of land hitherto raw and unproductive and had therefore performed a work of development of considerable proportions.

While believing that revaluation presented difficulties almost insurmountable, the committee states that some measure of relief should be granted in consideration of the fact that the payments to be met are too heavy to permit of the settlers' success. It recommends that stock and equipment loans be placed on the same basis as loans for land purchase, namely, 25 years, and all loans be consolidated at 4 per cent, 1922.

It is further recommended that settlers established prior to October 1st be granted exemptions from interest payments for periods varying from 2 to 4 years; the four years exemption to apply to the settler who went on the land prior to the first of October 1919; the three years to the settler who was established in the following year and the two years to the settler who was established in the twelve months prior to October 1, 1921.

The report also states that all the recommendations made by the 1921 committee of the house were carried out by the soldier settlement board, none, however, involving any change of legislation.

Berlin, June 24.—Dr. Walter Rathenau, former minister of foreign affairs, was assassinated this morning.

The assassin was shot and instantly killed as he was leaving his residence in Grunewald, a suburb of Berlin, for the foreign office in an automobile. Official announcement of Dr. Rathenau's death was made in the evening. The murderer, who was driving in a motor car, slowed up as he was nearing Dr. Rathenau and fired twice at the foreign minister, the shots taking immediate fatal effect. Putting on speed the assassin escaped.

PALPITATION OF HEART SHORTNESS OF BREATH

When the heart begins to beat irregularly, palpitations and throbs, skips beats; when there is shortness of breath, smothering and all-gone sinking sensation it causes great anxiety and alarm, but there is so need to worry just take a few boxes of Millura's Heart and Nerve Pills, and see how quickly they will relieve you of your trouble.

Mrs. Alice Bishop, 12 Hawthorne Ave., Hamilton, Ont., writes—"I take pleasure in recommending Millura's Heart and Nerve Pills to all persons troubled as I had been. I suffered from palpitation of the heart and shortness of breath; my heart would skip beats, and in the night, at times, I would have to sit up to get my breath. I could not go upstairs without my heart fluttering, and my nerves were all unstrung. Doctors did not help me any, but since using your famous Pills I have felt like a different person."

Price 50c, a box at all dealers, or mailed direct on receipt of price by The T. Millura Co., Limited, Toronto, Ont.

MILLET

Mr. and Mrs. English left for Peace River on Monday where they will spend their holidays.

Jim Blades arrived home from Edmonton where he has been confined to the hospital for a number of weeks with pneumonia.

Millet agricultural fair takes place on August 21st. The school fair will also be held on this date. Boys, do not forget the Mitchell cup for the best 1922 calf. The winner of the cup shall win \$25.00. Full particulars can be obtained from Harry Stuart, the secretary of the fair.

The agricultural fair barn dance took place at Fred Higginson's barn last Friday and was a big success.

Millet's 12th annual Board of Trade picnic takes place on Saturday, July 1st. The Hobbema baseball team will play Millet and will be a very exciting game. The players with the Hobbema team are all of Indian blood and A.I. players. Basketball teams who will play are Coal Lake and Penora Park. Sports of all kinds will be held for the children and money prizes will be given. The dance in Playon's hall will start promptly at 8 p.m. and the Millet orchestra will be in attendance. Wetaskiwin and Leduc will be at Millet on July 1st in large numbers.

The Trail Rangers' camp at Pigeon Lake this year leaves Millet on July 4, Sunday save a big lot of visitors at the lake. Campers are pitching their tents and quite a few are building cottages. Boats are making their appearance and Pigeon Lake bids to do a roaring business this season. The lot prospect looks good.

Fred Playon is around again and is feeling fine after his five weeks' illness.

Ed. Purlong and Miss Helen Weston were married on Friday last at Millet and left on the afternoon train from Wetaskiwin for Banff and Lake Louise for an extended honeymoon. Who's next?

Harry Stuart, Miss Daisy Atkins, Mr. and Mrs. Kent and family spent Sunday at the lake.

James Ellis is back again in Millet. All the good ones come back. Quite a few of the citizens of Wetaskiwin have been paying us a visit lately. We wonder if it has anything to do with the Chautauque.

We were thinking of having the Chautauque in Millet but we realized it could not be done owing to the fact that the whole town would have to be mortgaged to pay the bill, so we will have to be content to buy a season ticket and watch Wetaskiwin smile.

Millet has also been receiving quite a few visits from the Jewish fraternity who are all eager to open stores in Millet, but owing to their being unable to rent a store they are deciding whether to build or not, and when they do decide it will be impossible for them to buy a lot suitable unless they go to Wall Street. Last Wednesday Millet looked like a new Jerusalem.

Clean up day at the cemetery was not attended in large numbers like it has been in former years. Another day will soon be set aside for the making of roads when everyone will be notified. Please do your utmost to be there and help put in the roads, and make the cemetery look as though it was something.

A few rain showers have felt lately but nothing to hurt. Rain is needed in the district.

Don't forget the board of trade dance at Playon's hall on Saturday night after the picnic.

J. Meyers is now running a cream route out of Millet.

The U.P.W.A. held a meeting at the home of Mrs. Herman Arnold on Wednesday last which was well attended. Mrs. Ross while driving home from the meeting at Mrs. Arnold's on Wednesday last, was thrown out of the buggy. Although shaken up pretty badly she was not seriously hurt.

Buy Rowley's house in Victoria Addition is going up fast.

T. Palfrey, soldier settlement supervisor, paid Millet a visit on Saturday night.

Len Burgher was at Wetaskiwin on Saturday night in his new car.

Campers are leaving Millet daily for the lake. A large number of Edmonton people are also running down every day and tripping out to the lake. It is the lake or the oil.

Rails were here last week and was attended by large crowds at the afternoon and evening performances.

Gasoline tanks in Millet were doing big business at Millet on Sunday last. Most of the cars had enough gas to run them to Millet from Edmonton.

What is one's loss is another's gain.

Don't forget the Juniors' baseball game at Millet Saturday. Leduc vs Millet at 12:30 sharp.

Millet vs Hobbema Braves game at 1:30 sharp.

Basketball, Penora Park vs Coal Lake at 7 p.m. Dance at 8 p.m.

All the players must be on the field at least half an hour before the time of their game. Lunch will be served on the grounds by the ladies' aid of the Methodist church.

Stores in Millet will be closed between one and five p.m. on Saturday. We understand that an Edmonton firm are shortly building a brick garage and auto supply house in Millet.

The week of July 9th will be paint up week in Millet and everybody is requested to paint up and let us have our little town bright.

Most of the stores are going to put special prices on paint and brushes, and it is to the advantage of everybody to get busy and do a little painting, and as the paint men say "Save the surface and you save all."

WITH PROPER CARE POULTRY DISEASES CAN BE PREVENTED

During the past few years the increasing demand for eggs of a standard quality, and the high prices prevailing for this commodity, have led to an effort amongst poultry instructors and pioneers in poultry raising, to stimulate this industry by advocating the use of backyards in cities and waste ground in rural districts for maintaining a small flock of fowls. It has been shown that a decided profit can be made where ordinary precautions are taken in regard to feeding, cleanliness and selection of breeding stock.

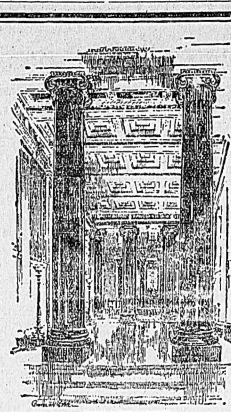

With proper care most common diseases can be prevented, and of all the measures directed towards this end, sanitation plays the most important part.

This is especially true on small holdings where the runs are limited and must of necessity be used year after year. Where it is not possible to rotate the runs, the entire surface after being covered with a good coating of air slaked lime, should be plowed or spaded. This precaution serves to keep parasites such as tapeworms, roundworms, gapeworms, etc., in check by destroying the eggs which are nearly always present in the soil. Droppings from fowls should never be spread on land to which chicks have access, and during the fly breeding season, all manure should be kept in covered boxes or treated with some good disinfectant before being put on the land. This applies more particularly to small holdings and to plants devoted exclusively to raising poultry.

All chicks which die should be burned and if a good plan to kill all the weaklings and dispose of them in a similar manner. Close observation is essential to pick out ailing chicks or fowls and these should be isolated from the remainder, until the exact nature of the disorder is determined. Particular attention should be paid to the feed and drinking water and where young chicks are concerned, a daily scalding of the drinking fontaines and feeding dishes will well repay such effort. Tuberculosis is a disease of adult fowls and is less frequently observed in pullets than in older birds. Tuberculosis is usually introduced by buying pullets or stock from outside sources and such a practice is to be discouraged except when purchasing from reputable poultrymen. Where exhibition stock is kept, all show birds should be segregated for at least two weeks upon their return from the exhibitions, as such a precaution often safeguards the flock from a serious infection of chickenpox. In introducing new breeding stock, even from a reputable producer, the practice of quarantining is a safe plan to follow.

The proper disinfection of fowl houses, etc., the quarantine of recently imported fowls or those returning from shows; the elimination of spoiled feeds and impure drinking water; the sacrifice of ailing birds to determine the nature of the disorder, as well as the burning of all dead fowls, are measures, which if carefully followed, will do much to keep the flock in a healthy, vigorous state and make the keeping of poultry a pleasant, profitable enterprise.—Experimental Farms Note.

Financial Strength

THE principles upon which a Bank is founded, the number of years it has been in operation, and the policy followed during these years—these features, combined with its present standing, from the criterion of the strength of a Bank.

The Bank of Montreal began business in the year 1817 with a modest capital of \$350,000, and for over a century it has followed a conservative—aggressive policy until to-day its capital and reserve fund total \$54,500,000 and its total assets are in excess of \$650,000,000.

RADIO MAY CHEER THESE ISLANDERS

Radio is likely to bring some of the strangest and most isolated corners of the world into relation with the rest of the world. The British island of Tristan da Cunha, in the middle of the south Atlantic, with its 120-odd souls, mostly descendants of Napoleon's St. Helena guards, who hardly hear civilization more than once in two years, is one of the places thus to be linked up.

For more than eighteen months an English clergyman and his wife, by the name of Rogers, have been trying to reach the island from Cape town, and finally induced the captain of the Japanese steamship Tacoma Maru, which left Capetown on March 26 for the River Plate to deviate from his regular course and land them at Tristan da Cunha.

A passenger on the Tacoma Maru tells of the vessel's call at the island with Mr. and Mrs. Rogers and their radio outfit, as follows:

"The student of evolution, the psychologist as well as the missionary, would find much to interest him in this curious, forgotten community. The settlement originated, it is said from a detachment of soldiers who were guarding Napoleon at St. Helena to the north, and who were sent to Tristan da Cunha to forestall the possibility that Napoleon might escape thither. Two of the soldiers remained, and importing wives from St. Helena, laid the foundation of one of the strangest settlements in the world."

"From time to time shipwrecked mariners have added to the inhabitants of the island, who have married and intermarried until relationship after a century has become a hopeless tangle. Nearly all the present population were born on the island and have a colored strain in their blood. They speak English with a peculiar drawl, resembling west of England speech. There is one old Indian among them shipwrecked from a sailing vessel who appears to have forgotten his name, and in fact his mother tongue."

Continued intermarriage has in this generation produced some pitiful children, some of them idiots, some lack limbs, some are deaf and dumb. The population does nothing agriculturally except to cultivate potatoes. On their food, together with the food and vegetables they carry ashore, they live. There are a few wild cattle and a few sheep, and out of the wool of the latter the women knit rough woollen stockings. That is their only manufacture. They are old clothes, mostly women's, begged from ships that visit the island at rare intervals. There being no commerce, there is no need for money.

"The islanders' attitude towards visitors is curious. As he stands before one his head droops, his arms fall listlessly to his sides, and he answers happily and uninterestingly questions to his life and mode of existence. He seems to have no other interest than to trade a penguin, an albatross skin or a seal flapper for an old shirt, a little tobacco or anything from civilization that would be useful. His tobacco is slowly and with difficulty, as if he had almost forgotten speech. I did not see one smile."

"Tristan da Cunha is a mountain 4,000 feet high rising out of the ocean wastes like an inverted pudding bowl, and as we saw it, was wrapped in swirling mists. The little colony lives in stone huts on a green strip of pasture land at the foot of the mountain. "Having no commerce and no money, these people certainly cannot worship Mammon, but it is doubtful if they worship God. The two plucky missionaries who have existed themselves among them for at least two years will try to teach them. They brought large quantities of supplies and civilized comforts and a radio set, so that broadcasts from Cape town can be cut off entirely from the outside world."

One Thing Sure

One thing is true when other things are lies—the taxes rise, and higher still they rise. I view the past the golden yesterday, when twenty houses would make my record clear. My tax, twenty bucks would cover all my tax and yet I yelled like forty-seven yaks. "The government," I used to say, "just holds me up, and beats my way away." A hundred bones where once I coughed up ten, I now dig up for tax collecting men; assessors come and cinch my bottom plank, this thing

NUMBER OF CHANGES MADE PENSIONS ACT

Ottawa, June 26—Widowed mothers, in the discretion of the pension board will include a mother deserted by her husband, provided that during such separation she was not aware of her husband's whereabouts and was not supported by him, according to an amendment to the Pensions Act, moved by H. S. Belland, minister of soldier's civil reestablishment, and passed in the house Friday.

Another clause adopted provides for the granting of a pension to a widow who served a soldier after he became disabled.

Section eleven of the act was amended to provide that any soldier who was discharged with a disability would be considered to be suffering from a disability attributable to, or aggravated by war service, unless the board could show otherwise. This amendment was drawn by law officers of the crown to cover a point raised in committee. A clause providing that a pension may be refused to one who is "immoral" was dropped, the opinion being that people's views on morality differ.

CHURCH CHIMES

IMMANUEL CHURCH
July 2, Donaldson Sunday—

Service will not be held in the church on this date. A united service will be held in the Chataqua tent at 7:30 p.m. All members of the Anglican congregation are invited to be present.
3 p.m.—Sunday school.

Millet—7:30 p.m.

The pastor will give a special address for the young people upon the occasion of their graduation. Every-body should come to this service.

SWEDISH MISSION
Sunday morning service in the Malmo church at 10:30.

In New Sweden the service will be at 8 o'clock in the evening.

The pastor will preach at both services.

NEW NORWAY

On Tuesday evening of last week a large number of friends and neighbors gathered at the home of Mr. and Mrs. Ole Ostad, to bid farewell to them and to Mr. and Mrs. E. E. Oliver, all of whom are leaving for the Peace River country. Mr. and Mrs. Ostad have been residents of the district for twenty-eight years and were the first settlers in this part of Alberta. Several presents reviewed the reminiscences of the early days and festivities concerning the sterling worth of Mr. and Mrs. Ostad. On behalf of the gathering, Frank Olson in very complimentary terms presented the Ostad family and Oliver family with a substantial purse. Mr. Ostad left on Saturday morning with a car of settlers' effects for Varena, Alta., where he has extensive ranching interests.

Both miners and operators of district 18 have rejected the award of the Knowles conciliation board, following meetings held on Saturday by both parties to the dispute. The operators reached their decision early Saturday morning and the miners decided to reject the findings Saturday afternoon before they had learned of the action of the operators.

Is true, though other things be bunk. And yet perhaps if taxes were to shrink, the land we love would soon be on the blink. We're paying roads and building finer schools, and ornate jails to house bootlegging fools; the money goes, blown in with princely graves, to make the world a better, nobler place. If this is true, it is not wise to roar because we're cinched far tighter than of yore. If this is true, we should be dead game sports following meetings held on Saturday by both parties to the dispute. The operators reached their decision early Saturday morning and the miners decided to reject the findings Saturday afternoon before they had learned of the action of the operators.

Naming the Montclare

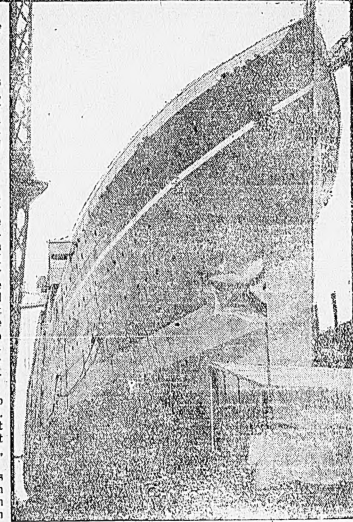

(At the Naming Ceremony of the New Canadian Pacific Steamship "Montclare" by Lady McLaren Brown before the luncheon. Lady Fisher, Sir Charles Ellis, Lady McLaren Brown, Lady Gracies, Sir George McLaren Brown, Mr. Kenneth MacKenzie, Sir Thomas Bell and Captain Morris.

WHY SHIPS AS "SHE"?
Inspecting the "model" room before the luncheon, Lady Brown remarked how strange it was that since first they sailed the main ships had always been spoken of as "she." "I suppose," she added, "they made her a woman because they found out that, loved and humoured, she is an angel, but driven—well, she isn't." She thought it was Kipling who said that ships were like women in that they had many secret hopes and dreams. Flow-

ership ship trust that the model ship "Montclare," the new C. P. R. Liner, would prove to be what all women hoped and dreamt of—the beautiful, the strong, and the true.

One of the raciest speeches ever heard at a Clyde launch was that by Lady McLaren Brown, following the luncheon at Messrs. Brown's Yard, December 16. While the new Canadian Pacific liner was not put into the water, her Ladyship christened the vessel, and as a souvenir she received a beautiful brooch which the recipient declared would give a fresh lease of life to her dress and thereby gratify her husband,

The new Canadian Pacific Steamship "Montclare," 15,200 tons, as she appeared before launching at the Yards of Messrs. John Brown & Co., Clydebank, Scotland. The speaker was the wife of Sir Lady Brown, a Canadian, was George McLaren Brown, the both elegant and charming. European Manager of the C. P., who was warmly congratulated on her contribution to the post-prandial oratory, to Liverpool for the launch.

Fifty thousand workers in the men's clothing industry left their jobs in the New York metropolitan area on Thursday to force manufacturers to let their work out to registered union contractors. It was announced by Hyman Rosenberg, chairman of the New York Joint Board of Amalgamated Clothing Workers of America.

The Wetaskiwin Times

A MEMORIAL TO A GREAT EXPLORER

Trading post and fort of Indian days, with sketches and histories to be erected on the shore of Lake Windermere, B.C., near where David Thompson built Kootenai House, the first trading post established west of the Rocky Mountains.

MENTION of the name of David Thompson would convey little meaning to the average Canadian, and yet no one dies in his day to open up new trade routes through the hitherto unknown depths of the Canadian Rockies and to apply scientific map making to the geographical exploration of the West. His day was over hundred years ago, when the trade of the West was entirely a fur trade and almost entirely in the hands of two great Companies, the Hudson's Bay Company, with headquarters in England, and the North-West Company, with headquarters in Montreal. David Thompson was a sturdy school boy who went out to Canada in 1784 at the age of fourteen years to take service in the Hudson's Bay Company. Thirteen years later he joined the rival North-West Company, which offered him better facilities for survey and exploration. The first trading post established by a white man West of the Rockies in what is now known as British Columbia was erected by David Thompson, on the shores of Lake Windermere, in July, 1807, and the opening up to civilization of the Columbia and Kootenai Rivers was largely due to his enterprise during the succeeding years. All this time he was making surveys and supplying the foundation for the Government and the maps of today. From 1816 to 1820 he was engaged by the British Government in surveying and defining the boundary line between Canada and the United States from Lake Canada to the Lake of the Woods. At the age of eighty-seven he died in poverty at Montreal, where he remains buried under a monument in Mount Royal Cemetery. Yet accurate were his records and surveys that in 1857 the Canadian Government decided to publish a map of Western Canada, they had to fall back on the map made by David Thompson in 1813.

While he was regarded as a fur trader, says his biographer, Mr. J. B. Tyrrell, Thompson travelled more than 50,000 miles in canoes, on horseback, and on foot through what was then an unexplored country.

Forty Years Of Suffering Finally Ended

Troubles Gone Entirely Now
But He Could Not Have
Held Out Much Longer
Without Tanlac, Says D.
McPhee—Gains 15 Pounds

"When a man has suffered like I have for forty years, he knows how to appreciate good health, and when I bought Tanlac I bought good health," is the statement of D. McPhee, a well known miner, now operating his mine at Notman Sound, N.C. Canada.

"My trouble started in 1880, and I have spent lots of money on many treatments but kept getting worse. When I ate a few bites my stomach started and I hated to see meal time come. Rheumatism set in and I also had to take laxatives all the time. My weight fell away."

"Well, now I have a fine appetite and everything tastes good. I can't tell I ever had rheumatism and now I have gained fifteen pounds. I am going back to work now, and I will always look the pride of Tanlac."

Tanlac is sold by all good druggists.

SUMMERFALLOW SUBSTITUTES

While no one questions the fact that summer fallow will practically insure a crop the following year this practice has its undesirable points as well.

Probably the first drawback to the use of the summer fallow is its cost. Another is the fact that it causes a serious loss of humus from the soil with the resultant danger of soil drifting. These disadvantages are so serious that it is necessary to find substitutes to replace the bare fallow.

The first requisite of a summer fallow substitute is that it produce the same result in preparing the land for grain crops that the fallow does without all its disadvantages. Intertilled crops have a great many of the advantages of the fallow in the preparation of the ground for corn, and while they do not entirely eliminate its disadvantages, yet do so to a large extent.

The number of crops which may be considered intertilled crops has been considerably increased by the plan of sowing small grains and summer crops in double or triple row groups with wide spacing between the groups of rows.

Corn is one of the intertilled crops which has proven its value as a summer fallow substitute. It can be successfully grown over a considerable area of the west and experiments carried on over a number of years have proved conclusively that, in the event of fair rainfall, wheat will yield fully as well, if not better, after corn than after bare fallow. Corn also possesses the added advantage that it makes excellent growth on the fallow, particularly if the land has been fallowed previously to planting the corn.

Potatoes, also, have proven good summer fallow substitutes through the yield of wheat after them is hardly as good as after corn.

Less experimental work has been done with the other crops as yet but some of them at least show decided promise.

Stunflowers will give a larger yield of fodder than corn under the same conditions but the results so far as they have gone would indicate that the moisture requirement of the crop is no great as to tend to lessen the yield of the following grain crop.

Roots are not so satisfactory on account of the large amount of labor required to handle them and also because they do not yield heavily on an arable ground.

Very little data is at present available on the growing of intertilled crops of wheat, oat and barley in two and three row groups, and also rye and similar crops. It has, unquestionably been established that they will yield sufficiently well to pay but data on their effect on the following crop of grain is not available yet but should be before long with the amount of experimental work being done in this connection. They, undoubtedly, show decided promise and are worthy of extensive trial.

BILIOUS ATTACKS DULL HEADACHES

"When the liver becomes sluggish and inactive the bile becomes constipated, the tongue becomes coated, the stomach food and sick and dull bilious headaches occur."

Milburn's Laxa-Liver Pills will clean the coated tongue and food stomach, and banish the disagreeable bilious headaches.

Mr. Charles Murray, 200 Hamilton Road, London, Ont., writes:—"After trying a great many remedies for my bilious attacks, which caused many days of dull headaches and miserable feelings, I tried Milburn's Laxa-Liver Pills, and now feel like a new creature. We sleep then as sound all the time, and find it beneficial to take an occasional dose, as they clear up the liver and make one feel like living."

Milburn's Laxa-Liver Pills are 25c. a trial at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

PRIZE LIST FOR THE WETASKIWIN EXHIBITION, AUGUST 14-15-16.

Poultry		
Director in charge, C. H. McMurdo		
(a) The card of the Association will be placed upon each coop, giving the number and variety of the exhibit, but no other will be allowed on any coop or coop until the judge has completed his awards.		
(b) All specimens except Game and Game Bantams must be exhibited in their natural condition.		
(c) No birds will be allowed in the show ex-		

cept those entered for competition.

(d) The "American Standard of Perfection" will be the guide for the Judge.

(e) All birds must be delivered at the Fair Grounds not later than 10 a.m. on Monday, August 14th, as the judging will commence promptly at one o'clock on that day.

(f) In any class, if in the Judge's opinion, a bird is not worthy of first prize, it shall be placed accordingly, but no prize shall be withheld simply because there is no competition. Entries close positively on August 12th, 1922.

All entries must be owned by the exhibitor. Express charges must be prepaid or birds will not be received.

The Association will provide feed for poultry. Prize List Classification

Prizes will be awarded for best Cock, (section one); Hen (section 3); Cockerel (section 3); Pullet (section 4).

Calgary Exhibition

The best program ever arranged for the entertainment of exhibition visitors has been prepared for the patrons of the forthcoming Calgary exhibition, June 20th to July 7th.

As a matter of fact, the 1922 exhibition will be the best ever held from every point of view. All exhibit space has been taken up and many new exhibitors will appear in the buildings.

The first four days of the exhibition will be featured by horse racing. His Excellency, Baron Byng of Vimy, governor general of Canada, will pay his first visit to the exhibition on July 4, when he will perform the official ceremonies. Thereafter until the conclusion of the exhibition on July 7th he will be a constant visitor.

Pity thousand invitations have been sent out to boys and girls of southern Alberta, Red Deer and south-western areas of age and under, to be the guests of the exhibition on Boys Day, July 7th, when a special program has been arranged for the morning beginning at 10.30, with the inspection by Baron Byng of the Southern Alberta Boy Scouts, followed by an address from the grand stand platform to the girls and boys by his excellency. A band will be in attendance for the program and Arthur McFadden will conduct community singing. Special features of interest to the girls and boys have been added to the regular attractions program for the afternoon and evening and the management proposes to entertain all the girls and boys who accept the invitation in such a way that they will long remember the 1922 exhibition.

Special rates on all railways are being offered for the exhibition, or if there are those who care for motoring and camping there is an ideal camp placed at their disposal by the Calgary Auto Club with all conveniences and no charges made for use of same.

With more than one million members, the Order of the Eastern Star is believed to be the largest women's organization in existence.

Calgary, June 26.—With a reasonable amount of rain from now on the wheat yield in Alberta will exceed that of last year, according to the weekly report of the United Grain Growers, given out here Friday. Oats, barley, and rye are not so promising, it is said.

Miss Kathleen Twomey, Downsview, Ont., writes:—"We always keep a bottle of Dr. Fowler's Extinct of Wild Strawberry on hand, and have always found it to be invaluable in all cases of cholera and diarrhoea."

Last fall my mother had a very severe attack of cholera, and after she had taken four or five doses of this medicine she was completely recovered. Ordinarily, however, one dose is sufficient. We cannot praise this remedy too highly for what it has done for us."

Be sure and get the original "D. Fowler's" when you ask for it. Price, 50¢ a bottle; put up only by The T. M. L. Co., Limited, Toronto, Ont.

IMPORTANCE OF ROAD DRAGGING**AND MAINTENANCE COMPETITIONS**

How to make the most of an earth road was clearly brought out in an address on "Road Dragging and Maintenance Competitions," delivered by H. S. Carpenter, deputy minister of highways for the province of Saskatchewan, at a session of the ninth annual convention of the Canadian Road Builders' association held at Victoria, B.C.

"Many states south of the international boundary," said Mr. Carpenter, "are known to the road building fraternity as 'earth road states'. To be thus characterized does not of necessity imply a reflection on the condition of the roads in these states. It may mean that they, like Saskatchewan, have not been supplied with material from which broken stone or other hard road material can be obtained within their boundaries, and they are obliged to make the best of the clay, sand and gravel which is found commercially available for road construction purposes." We know that some states have used this inferior building material to good purpose. If in addition to being known as earth road states, it will have gone a long way towards removing any reproach which the former term may imply.

"Saskatchewan is an earth road province, and the same may be said probably of the provinces of Manitoba, and Alberta, for although it might be rashness for anyone to state that some of the time in the future these provinces may not be served by main roads surfaced with some form of durable road material we have to face the fact that there is not at present available material from which to obtain broken stone with which to build hard surfaced roads. This material has been shipped into Saskatchewan for use in paving our city streets. There is also a possibility that it may be obtained from the rock deposits which occur in the northern parts of the province when building facilities make its transportation possible. The cost of this material at present makes its use prohibitive for any extensive program of improvement of our rural roads. The same may be said of the relatively small amount which can be obtained from field stone.

We sometimes indulge in speculation as to whether or not some process of treatment may not be devised by which our prairie clays and gumbos be converted into a material which may be used as a substitute for the broken stone, slag or other hard durable road surfacing material used in other countries. It is pointed out that it took many years of patient labor and experimenting to demonstrate that the soil of the northwest would produce crops. Many of us remember certain sections of the west which were looked upon as barren wastes, hopeless from an agricultural point of view.

"Through the hard work, perseverance and intelligence of the earliest settlers all difficulties have to a large extent been overcome and it has been demonstrated that the soil of the prairie west could be so treated as to be converted into the very best of farm lands. It is reasoned then that there are grounds to hope that the road builder may in a similar manner work out his own salvation, and in time evolve ways and means of converting prairie soils into serviceable road material. Certain characteristics of our gumbos soils it must be admitted are such as to lend encouragement to this optimistic outlook. If you examine the surface of some of the unpaved roads in the vicinity of Regina a few hours after a rain, when the surface has dried out sufficiently to have lost its stickiness but is still plastic, it will be found that portions of the surface, where they have been rolled out and compressed by heavy motor tires have been converted into a material which in that state would make a good road surface. It is so hard it will take a pole, as tough as leather, and so dense that one would expect it to be waterproof. As it dries out under the rolling of traffic these properties increase. If we could devise some means of drying it in this condition it might be utilized as serviceable road metal. But we know only too well what happens to it the next time it rains.

"Methods of burning clayey roads have been tried in the construction of 'burnt clay roads.' This has met with more or less success in districts where fuel is plentiful and cheap, but this treatment does not promise success in western Canada where fuel is scarce.

"We do not wish to dampen the enthusiasm of the optimists or even the dreamers; on the contrary these should be encouraged, but in the meantime it does not seem wise that we should divert our hopes of providing the prairie provinces with serviceable roads until some genius has evolved some magical process of transmuting prairie mud into hard road metal.

"A well constructed earth road in good condition affords an excellent roadway not only for team traffic but also for automobiles. The essential feature of a good earth road is drainage. To attain this requires provision for drainage of the surface, above the ditches, culverts and bridges, and last but not least, a surface so constructed that water falling on it will be quickly shed to the side ditches. Concerning the likelihood of an earth road with regard to the permanency of its surface the question of providing a serviceable earth road becomes largely a question of maintenance, and because of the quick deterioration of an earth road, especially in wet weather, its maintenance must be continuous. This need not discourage us, however, and the very characteristics of a road surfaced with top soil which cause it to deteriorate so quickly make its restoration possible at a comparatively small expense. This can be accomplished effectively and at small expense by a proper use of the road drag.

The Deputy Minister of Saskatchewan Highways Gave Good Advice on Earth Road Making

formation of an earth road, especially in wet weather, its maintenance must be continuous. This need not discourage us, however, and the very characteristics of a road surfaced with top soil which cause it to deteriorate so quickly make its restoration possible at a comparatively small expense. This can be accomplished effectively and at small expense by a proper use of the road drag.

"The advantages to be obtained from a persistent and intelligent use of the road drag," stated Mr. Carpenter, "are enumerated in a bulletin issued by the United States office of public roads as follows: The maintenance of a smooth, serviceable earth road free from ruts and mud holes; obtaining such a road surface with the expenditure of a very little money and labor in comparison with the money and labor required by other methods; the reduction of mud in wet weather, and of dust in dry weather; the banishment of weeds and grass from the dragged portion of the road; the right to compare here one of the most beneficial results of a proper use of the drag, yet one which is very often not attained. This is that while the drag performs an excellent service in smoothing the surface of the road, filling up the ruts, maintaining the crown, etc., it also if used at the right time, will provide the road with a hard, partially waterproof coat of puddled clay which makes a very satisfactory wearing surface. To accomplish this the dragging should be done only when the surface of the road is sufficiently wet that the mud is completely readily under the drag, and yet will not stick to it nor ball up into pasty masses.

"The drag used when the conditions are just right, puddles the surface of the road, not only filling up the ruts and smoothing it, but forming a more or less waterproof surface. Continued dragging under these conditions tends to increase the hardness and thickness of this protective coating and if persisted in a very effective wearing surface may be obtained. This beneficial effect is not attained by dragging a road when it is dry. In fact dragging a dry road may do more harm than good as this will probably loosen the surface so that the road is covered with a layer of loose material which quickly becomes dust, and when wet is turned into mud. In many districts where rain is not plentiful at certain seasons of the year the road is sprinkled before dragging in order to make the work more effective.

"Officials in charge of highway construction carried on by the government of the province of Saskatchewan have been convinced that the road drag could be made to play an important part in promoting good roads in that province, and realized that to bring this about it would be necessary to demonstrate its serviceability to officials responsible for conducting road work in the rural municipalities. To effect this several timber drags were purchased in 1908 by the department of public works, which at that time was in charge of the administration of the highways of Saskatchewan. These were distributed to farmers at different points and contracts entered into with these men to operate them according to instructions issued by the department.

"The department was fortunate at that time in having one of these drags operated by Sager Wheeler of Rosthern. This is the same gentleman who has since become famous because of the service he has rendered to the people of this continent in developing new and better kinds of wheat. Mr. Wheeler entered into the operation of dragging the stretch of road entrusted to him with the same enthusiasm and patient care for details which made him successful as an expert at growing wheat."

Mr. Carpenter then went on to speak about the road drag competition held in Saskatchewan since 1913 when they were first inaugurated, for the purpose of inducing as many of the rural municipalities as possible to give the road drag a serious tryout. There are 300 municipalities in Saskatchewan and the competition was open to each of them to make one entry on a stretch of road not less than two and not more than six miles long.

"This competition has been carried on every year since 1913, he has been changing slightly from time to time. Forty-two municipalities entered the competition in 1913, the number of miles dragged being 124.

at an average cost of \$11.86 per mile. These figures increased until in 1921 there were 171 entries in the competition, which resulted in the dragging of 670 miles of road at an average cost of \$19.92 per mile.

"The average cost of dragging per mile per season is obtained from the returns which are made by each entrant as required by the rules. I am of the opinion that the figure as to cost is somewhat higher than necessary to effect satisfactory results from dragging, as no doubt there is a tendency on the part of the competitors to devote more time to the prize list than would otherwise be the case under ordinary conditions.

"In 1914 requests were sent out to all the 300 rural municipalities in the province to make returns to the department of the number of drags in use in each rural municipality, the number of miles dragged in that year, and the total cost. Similar information was obtained for the years 1915, 1920 and 1921. In 1914 the total number of drags in use in the province was 961, and 2,200 miles of road was dragged at a total cost of \$14,444, or \$6.28 per mile, and in 1921 there were 3,116 drags in use and 13,110 miles of roads dragged at a total cost of \$149,090, or \$11.46 per mile.

"These figures indicate that there was an average of only three drags in each of the 300 rural municipalities in 1914 dragging 17 miles, and that these figures were increased to 10.4 drags for covering 43.3 miles in each municipality in 1921. This does not indicate that Saskatchewan has yet earned the right to be called a 'road drag province', but the results are such that we feel confident we may hope soon to attain that distinction.

"In conclusion I want to refer to two of the roads entered in the competition which I had an opportunity of inspecting. Early in October last year I went over the four mile stretch of the town of Estevan, Saskatchewan, which won the first prize in 1921 competition. Road conditions were very bad in Saskatchewan in the fall of 1921 on account of abnormally heavy rains. The rainfall for the month of September was seven inches. My inspection of the road south of Montmartre was made during the first week of October within two weeks after these heavy rains. This road was in excellent shape, hard and smooth from ditch to ditch, and just as pleasant and serviceable to ride on as any hard surfaced road. They had dragged it since the rains, but they told me that even during the period of heavy rains the road had been cut up only to a very small extent and they were able to drag it back into shape immediately after the rains had ceased. They did not get as much rain in the Regina district as we did in Regina, and the soil in the district is a light gritty loam, much more easily kept in repair than the Regina gumbos, but the difference between the road which had had careful dragging and other roads in the vicinity which had not, was such to render my belief in the earth road well given a little attention. The cost of the dragging of this road was only about \$30 a mile for the year.

"In 1920 I had an opportunity of inspecting another stretch of four miles entered in our 1920 road drag competition. This road I can assure you was a beautiful road to travel on, smooth and hard from ditch to ditch. You could travel on any part of it, either on the crown or on the sides, with equal comfort, and I noticed that travel was doing just that so that it was not being worn into two parallel ruts along the centre.

"I looked up the man who was operating the drag on this road to have a talk with him about it, and I can assure you the hour or more I spent with him gave me more new ideas on the maintenance question. The man was a road crank or a maintenance fan. He was at his dinner when I rapped at the door. I told him what I wanted to see him about and then said I would wait until he had finished his dinner, but he started in to talk about his road and lost all interest in his dinner. He took me

over to the road to show me his fine points. He explained to me how he found the water stood in the ditches in places and that with very little work he was able to drain the water away. He noticed that some parts of the road were easier to keep in shape than with a very little rain some parts became greasy and tended to cut up while other portions did not seem to be affected at all by the rain.

"He set out to find the reason for this and discovered that it altogether because of the difference in material with which the road was surfaced; that when the road crew had gone deeper in some points than at others they had brought up and spread over the surface the stiff, sticky clay found at greater depths. He himself set out to rectify this by spreading over the road the same kind of material he had found made the best results. The surface he was thus able to put on was very thin and of course will not last, but it was all he could do with the money and time at his disposal, but the result was that he was able to make the four mile stretch of road uniformly good throughout its whole length. These and many other features of the work he pointed out to me.

"I mention my experience with this road to bring home to you what can be done by a man interested in his work. He was devoted all the loving care to this road which some of you men lavished on your first new car; and I can assure you that his four mile stretch of ordinary earth road responded to his efforts.

"I mention these examples," stated Mr. Carpenter, "to illustrate what has been done in Saskatchewan with a little care in the maintenance of roads and this encourages me to believe that with additional care paid to this question of maintenance, we will have gone a long way towards solving the problem of making our earth or our gravel roads serve satisfactorily the people of our provinces."

The police investigating the assassination of Field Marshal Wilson have come into possession of documents, says the Central News, disclosing a conspiracy to take the lives of a number of prominent persons and to conduct a campaign of outrage.

Montreal as a Transportation Centre

THE recent celebration of the Centenary of the Montreal Board of Trade has recalled to memory the source of that city's original growth. A hundred years ago Montreal was the port of this Continent for the merchants who shipped to England the harvest of skins gathered by the trappers of the North-West, in exchange for British money and goods. It was the half way station between the far-reaching ports of the far interior and the markets overseas. The farming settlements of the West and the development of industries in Eastern Canada have changed the character of the traffic, and instead of the old sailing ships we have the coal and oil burning steamers of today, but the strategic strength of Montreal as a transportation and trading centre is essentially the same. It is a terminal at a port on a waterway which is the natural gateway into the interior of the North American Continent.

The canoes and batteaux of the old fur traders have given place to powerful locomotives capable of hauling a hundred or more forty-ton freight cars over a track of steel and to transcontinental trains running from Atlantic to Pacific, just as the schooners of Quebec were the store-runners of the great modern fleets of merchant steamers on the St. Lawrence.

There has been a tendency in some minds to think of railways rather as engineering undertakings than as merchandising organizations. Yet a railway depends for its prosperity chiefly on the traffic it can develop and that traffic is stimulated in no

TOWN TOPICS

N. W. Pond, local Ford agent, unloaded a carload of these popular cars last week.

E. A. Holbrook is erecting a new cottage at Pigeon Lake, which promises to be one of the best at the resort.

The W.C.T.U. will serve refreshments near the Chautauque tent for the balance of the week, the proceeds to be given to the Wetaskiwin hospital.

The public and separate schools of the city close on Friday of this week for the summer vacation and will open again on Monday, September 5th.

Dr. T. W. Moore, of Bassano, Alberta, accompanied by his wife and child are spending a few days at the home of his brother, Eli Moore, of Wetaskiwin.

Everybody who is not taking the opportunity of moving to their cottages at Pigeon Lake on Saturday, are talking about the U.F.A. Picnic to be held at the exhibition grounds on that date.

Mrs. Ernest Wulff, who has been visiting her grandparents, Mr. and Mrs. N. P. Nollan, left on Saturday afternoon to join Mr. Wulff at Hardisty, where they will visit relatives for a few days.

Mrs. Emily Murphy of Edmonton, will address a public meeting to be held in the Presbyterian church on Monday, July 10th, at 8 p.m. Her subject will be "Home and Country" Everybody is welcome.

Mr. and Mrs. V. C. French are expected home this evening from Ontario, where they have been for the past month, attending the convention of the Canadian Weekly Newspapers Association and visiting friends and relatives.

The regular meeting of the Cherry Grove U.F.A. local has been postponed until Friday evening, July 14, when an open social will be held at the home of Mr. E. Beckenhole. There will be band and other amusements, and a light lunch will be served.

The Wetaskiwin Band is planning to take an outing at Pigeon Lake on Dominion Day. The boys will play their instruments along and will play during the afternoon. It is possible that they will also furnish music for a dance on the beach in the evening.

J. F. Richards returned last week from a short visit to different points in Washington. His daughter, Vivian returned to Wetaskiwin with him. While in Seattle and Puyallup he made a round of visits with the many former Wetaskiwin residents there, whom he says, showed him a royal time during his stay.

ALBERTA FAIR DATES

Fair dates for the province of Alberta have been selected as follows: Calgary, June 30-July 7. Edmonton, July 10-15. Red Deer, July 17-19. Camrose, July 24-25. Lloydminster, July 24-26. Vermilion, July 27-28.

Lothbridge, July 31, August 1, 2. Grande Prairie, August 1-2. Macleod, August 2-4. Raymond, August 4-5. Magrath, August 5-6. Carleton Place, August 11-12. Stettler, August 14-15. Newton, August 19-20. Langdon, August 21.

High River, August 11-12. Okotoks, August 15-16. Carmichael, August 15-17. Pincher Creek, August 17-18. Lomond, August 2. Rellay, August 4-5. Oyen, July 25-26. Chinook, July 27-28. Youngstown, July 31, August 1, in Sibbald, August 2.

Richdale, August 3. Hanna, August 8. Hanna, August 8. Manson, August 9. Big Moor, August 10. Dry Valley, August 11-12. Didsbury, August 14-15. Frida and Millerville, July 26. Olds, July 25-26. Innisfail, July 27-28. Lacombe, July 31, August 1-2. Stettler, August 3-4-5. Wetaskiwin, August 14-15-16. Strathmore, August 7-8. Sedgewick, August 9-10. Dryden, August 11-12. Bowden, August 11-12. Didsbury, August 17-18. Edgerton, August 1. Wainwright, August 2. Claresholm, August 3. Provost, August 4.

Old-timers' reunion picnic will be held nine miles west of New Narwal on July 7th. Keep the date. Further particulars will be given next week.

Regina, June 25—Hull losses for which adjustments have already been made involving 50 per cent on some rye and as high as 25 per cent on the wheat areas were announced Friday by H. H. Campbell, secretary of the Western Grain Insurance Underwriters Association.

Cincinnati, June 23—Forty-four persons, two of whom were union coal miners, were killed at the mine disasters at Horrill, Illinois, according to a statement last night by Frank Harrison, president of the Illinois organization of the United Mine Workers of America.

There is every indication that the western grain route will develop still further during the next crop season. Vancouver last week had a visit from the chairman of the Bristol Channel Shipping Federation, Mr. Daniel Hadfield, who stated that ships of his company were almost certain to make their appearance in Burrard Inlet in search of grain and other cargoes during the coming year. He said there was a great interest manifested in British shipping circles in the Vancouver-Panama route and that plenty of tonnage would soon be available for it.—Journal.

Maybe you think Editor Hibbs of the Lehigh Times and pastor of the Christian church in that town, wasn't a busy man last week. First, he started off by welcoming a new baby baby at his home, then officiated at three weddings in a row. Thursday he had his machine turned turtle and broke a bull wheel and refused to run afterwards. There the office staff was with the paper due next day, and no type up. In this crisis, Mr. Hibbs hopped into his trusty Ford, drove over to a nearby town and got his type set in time to get his paper out Friday evening. Nothing short of an earthquake will stop the average country town editor.

TOWN TOPICS

J. F. Richards has erected a warehouse and coal shed at the rear of his harness shop.

Mrs. G. M. James returned Wednesday morning from Montana, where she spent several weeks with relatives and friends.

At the recent examination of the Associated Board of the Royal Academy of Music and the Royal College of Music, London, England, Oliver B. Lawson passed in grammar of music (division 1st). She is a pupil of Mrs. W. A. Macfarlane.

Miss Emmerson, graduate nurse of Hamilton general hospital, and at present engaged in child welfare work, will address the Girl's Institute Club and the Women's Institute on First Aid at the home of Mrs. A. E. Mills, on Monday, July 3rd. The time of the meeting will be announced by posters and on Sunday.

The number of new cottages at Pigeon Lake is increasing every year, and more have been put up this season than any previous year. There is a report now of the campers trying to get a well drilled to insure a supply of good drinking water. The Wetaskiwin Band are opening the camping season at the lake on Saturday.

Mrs. Geo. W. West, formerly of Innisfail, and now of Vancouver, is in the city on a short visit with friends. Mrs. West is a sister of the late Mrs. John West, and a sister-in-law of the late Mr. James Montgomery, whom she was with during his illness and death.

BUSINESS LOCALS

Two brand new kitchen tables \$2.00 each at the Gift Shop.

Home made Pastry every Wednesday and Saturday at the Candy Kitchen.

Remember
One-third of the entire nerve force is used to supply the eyes with perfect vision.
Unless this is properly distributed, imperfect vision and fatigue is the result.
An examination will very quickly reveal any defect.
